Naturtejo UNESCO Global Geopark

Hypsometry (m)

Main rivers

Lithologies

A - Iberian Massif

- Metasedimentary shales-greywackes
- Quartzite and shales with quartzite intercalatins
- Pré- and Variscan granitoid plutonites

B - Sedimentary cover of the Iberian Massif

- Predominantly clastic rocks

Tectonic

- Fault

Landforms

A - Structural forms

- Fault scarp

B - Fluvial forms

- Alluvial bottom
- Fluvial terrace
- Deep valley

C - Forms and deposits of slopes and interfluves

- Erosion border
- Slope deposits
- Dissection landforms of the shale mountains
- Residual landform in the bedrock
- Rañas and gravel plateau

- Major urban center
